# New Products and Processes

*Professional BoatBuilder* is now featuring press releases of the marine industry's newest products and processes in our monthly e-newsletter.

## JET-THRUSTER

The Jet-Thruster available through US Marine Products offers maximum maneuverability under silent operation. While other thrusters have large difficult-to-fit tunnels that cause more resistance, the Jet-Thruster, manufactured by Holland Marine Parts, offers smaller parts with a flexible and easy installation. Fits boats 20' to 60' (6m to 18m) as combination units or as single bow or stern units, ranging from 66 to 198 thrust lbs.

## PIERVANTAGE™ BOATYARD MANAGEMENT SOLUTION

PierVantage™ is the first and only integrated, cloud based marine management solution that helps boatyards and marinas operate more effectively, lower costs and increase customer satisfaction. PierVantage™ is easy to use and offers fast setup through a secure hosted service, eliminating the need to manage expensive hardware and software. PierVantage™ provides job management, billing workflow, employee time management, purchasing and inventory, accounting and administrative functions.

## AUTOMATED FUEL SYSTEM

This electronic fueling solution, available through US Marine Products, automatically shuts off the fuel-filling nozzle when the boat fuel tank is full. It also triggers a flash/buzzer letting the operator know it is full. By taking the sender signal at an adjustable level in the tank, the system activates an external mini-pump that sends fuel up to the nozzle and triggers the automatic shut-off. The control box can also be used to automatically turn on blowers or start other onboard components.

## CHARLES INDUSTRIES' INTELLIGENT MARINE CHARGERS

Charles Industries' (Rolling Meadows, IL) Intelligent Marine Chargers (IMC) were designed and built specifically for harsh environments. These durable battery chargers have a universal AC input with automatic configurations that accept 50Hz or 60Hz frequency in a 90 VAC to 265 VAC range. Features include limp home mode, smart alarms, simple intuitive menus, and memory buttons.
